ACCOUNTING FOR TRANSFER OF ASSETS

In the government-wide statements of activities, capital assets moved or transferred between government activities and business-type activities are reported as TRANSFERS. Because government fund type accounts focus on current financial resources, no entry is made at the fund level, but is recorded at the Government-Wide Financial Statement level. Capital assets transferred between funds or between financial reporting entity components should be transferred at their current carrying value, both the original cost and accumulated depreciation amounts will transfer (net book value). Capital assets transferred FROM the general government (governmental activities) to a proprietary fund (Enterprise -business type activities) is reported as a CAPITAL CONTRIBUTION in the Proprietary Fund's operating statement.
